

# **GREEN ORGANIC**

Patent Pending: 2003902064

## **ORGANIC CONDITIONER & COLOURANT**

**AN UNIQUE GREEN LIQUID HUMIC ACID  
TO COLOUR TURFGRASS WHILE  
DELIVERING ALL THE BENEFITS OF  
CONCENTRATED ORGANIC MATTER.**

### **ANALYSIS (W/V%)**

Humic Acid as Potassium Humates 12.0

### **DIRECTIONS FOR USE: TURF**

#### **APPLICATION RATE**

- Colourant: 0.5 - 1.0 L / 100m<sup>2</sup>  
WATER RATIO: 5 - 10 L / 100m<sup>2</sup>
- Organic Conditioner: 200 - 400 ml / 100m<sup>2</sup>  
WATER RATIO: 5 - 10 L / 100m<sup>2</sup>
- Spray Marker: 50 - 100 ml / 10 L

### **IMPORTANT APPLICATION NOTES**

DO NOT irrigate for 24 hours after application or on days when rain is forecast. Avoid contact with fixtures as green staining may occur. Wear protective clothing as per normal spray application as staining of clothing will occur.

# Simplot **GREEN ORGANIC**

## **INSTANT GREEN-UP**

Simplot Green Organic is specially formulated for application to turfgrass to give an instant natural deep green colour and condition the turf and soil at the same time. This product is designed to be sprayed onto the surface of the leaf and will remain there once dry. This is a very effective way of delivering environmentally friendly Humic Acid to turfgrass. Once colour has dissipated, the Humic Acids will remain to provide all the benefits of concentrated organic matter.

## **SOIL CONDITIONER**

Humic Acids are large organic molecules that have binding sites that will capture and store nutrients. The use of Simplot Green Organic will assist in the levels of humus in the profile and provide the flexibility required to grow quality turf. Adding Humic Acids will increase the ionic exchange capacity of the sandy soils, buffer toxic salts, buffer excessive pH ranges and stimulate biological activity resulting in root proliferation. Simplot Green Organic assists in overcoming stress conditions such as recovery from renovation.

## **OTHER BENEFITS**

The flexibility of Simplot Green Organic is shown by its use as a spray marker at rates of 50 – 100 ml per 10 L of spray solution. The spray will be indicated as well as delivering natural green-up and organic matter in one solution.

## **WARNINGS**

1. Do not water in immediately after application.
2. Apply on fine day with no forecast of rain
3. Avoid contact with fences or other fixtures as staining may occur
4. If contact occurs simply hose off contaminated area with water straight after application.
5. Wear gloves and protective clothing when applying as staining of skin and clothing may occur
